

* Sample business requirement document template.

→ problem => Common conditions in older age include hearing loss, contracts and refractive errors, back and neck pain and osteoarthritis, chronic obstructive pulmonary disease, diabetes, depression and dementia. but the main problem of older age people is that they cannot see well and they cannot walk properly.

1) executive summary :-

- as people age, they often experience a decline in vision. this decline can be attributed to various factors, including changes in the eye's lens, decreased sensitivity of the retina and slower adaptation to change in lighting.
- conditions like cataracts, macular degeneration and glaucoma become more common, further impacting visual acuity.
- These changes can affect daily activities and overall quality of life, making regular eye exams and proper eye care important for maintaining vision health in older adults.
- Technology: Introduce them to technology like voice-activated assistants or apps designed to aid those with visual impairments.

2] project Description :-

- Research has shown that we need to develop an application for older age people.

- The goal of making an application for many old age people, the following point.

1) Simplicity - The interface should be straightforward and intuitive minimizing complexity and avoiding unnecessary features.

2) Help and Support - provide easy access to tutorials, FAQ's and customer support. An in-app help feature or user guide can be very beneficial.

- why we need this project

→ It will make old age people life easy.

→ In our country, old age people number are large by solving there problem we will get more profit as well as our company become famous in common people.

3] project Scope :-

- Developing application for older adults can be a valuable and impactful endeavor. the scope of such projects is broad and can address various needs, including:

1) Health and wellness - Apps for managing medications, tracking health metrics, and connecting with healthcare providers.

2) Social connectivity :- platforms to help older adults stay connected with family and friends, including Social media or video calling apps designed for ease of use.

- 3) Safety and Emergency - Application for fall detection emergency alerts, and location tracking.
- 4) Financial management - Tools for budgeting, managing expenses, and detecting fraud.
- 5) Daily Living Assistance - apps for meal planning, shopping, and home maintenance.
- 6) Transportation - tools for easy navigation, ride-sharing, and transportation scheduling.

This application can help improve the quality of life for older adults by adding their unique needs and changes.

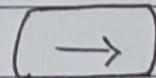

- 7) advantages of project :-
 - 1) Safety and security.
 - 2) Access to Healthcare.
 - 3) Companionship and Socialization.
